

## General Contracting Capabilities

Compu Dynamics offers nearly two decades of expertise in complex, engineered interior projects serving our customers as a General Contractor, Construction Manager, and Design-Builder. Unlike any other firm in the Mid-Atlantic, we employ our own Electricians, Mechanical Installers, Network Technicians, Carpenters, and Cage Builders. With a single point of responsibility, we provide fully integrated and cost-effective solutions resulting in highly satisfied customers.

While we thrive on mission critical projects like data centers, we also have experience building SCIFs, labs, and other high performance and mission support facilities.

### *End-to-End Project Management*

Compu Dynamics provides turnkey project management throughout every phase of the design and construction process.
