

# Cleared Services

Unique spaces call for unique providers. Compu Dynamics has provided services in some of the most secure, challenging, and demanding environments for our federal, state, and local government partners across North America and beyond.

We have an in-depth knowledge of the complex security and implementation requirements for public sector clients. We have the expertise and experience to develop mission-critical strategies and infrastructure solutions to meet the most secure client requirements.

Our team of highly skilled professionals boasts not only top industry credentials but also the clearances required to work in such environments.

Our cleared experience includes the following:

- General Construction
- Physical Security Design and Installation
- Electrical Installation and Service
- Mechanical Installation and Service
- Low-Voltage Infrastructure Solutions
- Fiber Optic Installation and Testing

We are currently part of the following GSA Contracts:

- Facility Maintenance and Management (03FAC)  
Contract number is GS-21F-0008W

Whether you are building new or retrofitting, let our team of industry experts assist you with your cleared facility needs. With more than twenty years of industry experience, you can rest assured your project is in capable hands.

From concept through completion, Compu Dynamics' in-house team brings you industry-leading capabilities all under one roof resulting in scalable and flexible solutions which meet today's requirements while anticipating tomorrow's demands.
